THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN AND JAMES D. DANA,

IN CONNECTION WITH

PROFESSORS ASA GRAY, AND WOLCOTT GIBBS, OF CAMBRIDGE,

AND

PROFESSORS S. W. JOHNSON, GEO. J. BRUSH, AND H. A. NEWTON, OF NEW HAVEN.

SECOND SERIES.

VOL. XLVI.—[WHOLE NUMBER, XCVI.]

Nos. 136, 137, 138.

JULY, SEPTEMBER, NOVEMBER.

WITH FOUR PLATES.

NEW HAVEN: EDITORS.

1868.

PRINTED BY TUTTLE, MOREHOUSE & TAYLOR, 231 STATE ST.

CONTENTS OF VOLUME XLVI.

NUMBER CXXXVI.

Page

ART. I.—Sketch of a Journey from Canton to Hankow, through China; by ALBERT S. BICKMORE,..... 1

II.—Preliminary notice of a Scorpion, a Eurypterus? and other fossils from the Coal-measures of Illinois; by F. B. MEEK and A. H. WORTHEN,..... 19

III.—On the formation of Nitrite of Ammonia; by O. LOEW, 29

IV.—Notes on some Algæ from a Californian hot spring; by H. C. WOOD, Jr.,..... 31

VI.—On Faraday as a Discoverer; by JOHN TYNDALL,..... 34

VII.—Chemical Apparatus; by W. P. DEXTER,..... 51

VIII.—On the Equivalent of Cerium; by the late Dr. CHARLES WOLF,..... 53

IX.—Laws of Botanical Nomenclature adopted by the International Botanical Congress held at Paris in August, 1867; together with an Historical Introduction and Commentary; by ALPHONSE DECANDOLLE,..... 63

X.—On the Sulphates of Oxyd of Antimony; by W. P. DEXTER, ... 78

XI.—On the Secular Variation of the Elements of the Earth's Orbit; by JOHN L. STOCKWELL. (With a plate),..... 87

XII.—On some Cretaceous fossil Plants from Nebraska; by L. LESQUEREUX,..... 91

XIII.—Recent Eruption of Mauna Loa and Kilauea, Hawaii, 105

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On a new mode of forming the organic sulphacids, STRECKER: On the transformation of uric acid into glycocoll, STRECKER, 124.—On an oxychlorid of silicon: On a universal method of reducing and saturating organic bodies with hydrogen, BERTHELOT, 125.—Carbonylic Sulphid, BERTHELOT, 129.—Test for naphthalin, VOHL: A Manual of Inorganic Chemistry arranged to facilitate the Experimental Demonstration of the Facts and Princi-

ples of the Science, by CHARLES W. ELIOT and FRANK H. STORER, 130.—On a mode of extracting the metals Molybdenum and Chromium; by J. ENEU LOUGHLIN, 131.

Mineralogy and Geology.—A system of Mineralogy; Descriptive Mineralogy, comprising the most recent discoveries, by J. D. DANA aided by G. J. BRUSH, 132.—The Mining and Metallurgy of Gold and Silver, by J. ARTHUR PHILLIPS, 134.—New Geological Maps and Chart: New borate from Mine Hill, Franklin, Sussex Co., New Jersey—Sussexite; by G. J. BRUSH, 140.

Botany and Zoology.—The Variation of Animals and Plants under Domestication, by CHARLES DARWIN, 140.—A second critical notice of Alcyonaria in the Museum of Yale College; by A. E. VERRILL, 143.—Note on Ethmophyllum and Archeocyathus; by F. B. MEEK, 144.

Astronomy.—Theoretical Astronomy relating to the motions of the Heavenly Bodies revolving around the Sun in accordance with the law of Universal Gravitation, by JAMES C. WATSON, 145.—Astronomical and Meteorological Observations made at the United States Naval Observatory during the year 1865, 146.—Small Planets, 147.

Miscellaneous Scientific Intelligence.—Petroleum Wells in Mexico, 147.—American Association for the Advancement of Science: British Association, 148.—*Obituary.*—Anton Rosing, 148.—Julius Plücker: Charles G. Page, 149.

Miscellaneous Bibliography.—A treatise on Meteorology; with a collection of Meteorological tables, by ELIAS LOOMIS, 149.—The Butterflies of North America, by WM. H. EDWARDS: Observations on Polyzoa, Suborder Phylactolæmata, by ALPHEUS HYATT, 150.—The Workshop: Transactions of the American Entomological Society, Philadelphia, 151.

Proceedings of Societies, etc., 151.

NUMBER CXXXVII.

Page.

ART. XIV.—A new Theory of Vision; by SAMUEL ROWLEY, 153

XV.—Fundamental Principles of Molecular Physics; by Prof. W. A. NORTON, ... 167

XVI.—On Faraday as a Discoverer; by JOHN TYNDALL, ... 180

XVII.—On Enargite from the Morning Star Mine, California; by EDWARD W. ROOT, ... 201

XVIII.—Physical Observations on the Andes and the Amazons; by JAMES ORTON, ... 203

XIX.—Notes on the Caucasus; by Capt. F. von KOSCHKULL, ... 214

XX.—On some points in the Geology of Vermont; by T. STERRY HUNT, ... 222

Page.

XXI.—Contributions from the Sheffield Laboratory of Yale College. No. XVII.—On Willemite and Tephroite; by WILLIAM G. MIXTER, ... 230

XXII.—Notices of papers in Physiological Chemistry. No. I. By GEORGE F. BARKER, ... 233

XXIII.—Contributions from the Sheffield Laboratory of Yale College. No. XVIII.—On Sussexite, a new borate from Mine Hill, Franklin Furnace, Sussex Co., New Jersey; by GEORGE J. BRUSH, ... 240

XXIV.—On an easy and very effective mode of showing the vibrations in Chladni plates, &c., to a large class, by the use of a calcium or electric lantern; by JESSE S. CHEYNEY, ... 243

XXV.—On new specimens of Eozoon Canadense, with a reply to the objections of Professors King and Rowney; by J. W. DAWSON, and notes by W. B. CARPENTER. With two plates, ... 245

XXVI.—On Aquacreptite, a new mineral, and on Corundophilite of Chester; by CHARLES UPHAM SHEPARD, ... 256

XXVII.—A new locality of Meteoric Iron in Georgia; by CHARLES UPHAM SHEPARD, ... 257

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Hinrichs's Atom Mechanics, FLECK, 258.—On Vortex-rings in Air, BALL, 260.

Mineralogy and Geology.—Twentieth Annual Report of the Regents of the University of the State of New York, etc., 262.—On a new large Enaliosaur, COPE, 263.—Bone caves of Brazil and their animal remains, REINHARDT, 264.—Paleozoic Entomostraca, JONES and HOLL: On the discovery of a new Pulmonate Mollusk in the Coal-formation of Nova Scotia, with a description of the Species, DAWSON and CARPENTER, 265.—Notes on Hetch-Hetchy Valley, HOFFMANN, 266.—Acadian Geology; The Geological structure, Organic remains and Mineral Resources of Nova Scotia, New Brunswick, and Prince Edward Island, DAWSON, 267.—On Subaërial Denudation, and on Cliffs and Escarpments of the Chalk and the Lower Tertiary Beds, WHITAKER, 268.—Death of Fishes on the coast of the Bay of Fundy, ADAMS: Geological chart of Southern Norway, representing the dioceses of Christiania, Hamar, and Christiansand, KJERULF and DAHLL, 269.—Revue de Géologie pour les années 1865 et 1866, 270.

Botany and Zoology.—The Book of Evergreens, a practical Treatise on the Coniferæ or Cone-bearing Plants, HOOPES, 270.—The Miscellaneous Botanical Works of Robert Brown, BENNETT: The Journal of the Linnean Society, Botany, BENTHAM, 271.—Théorie de la Feuille, DECANDOLLE, 272.—Obituary announcement, WARD and ARNOTT: Note on the Polymorphism of the Anthozoa and the Structure of

the Tubiporæ, KÖLLIKER, 273.—A Guide to the study of Insects, and a Treatise on those injurious and beneficial to Crops, PACKARD, 274.

Astronomy.—Notice of new Planets (98), (99) and (101), WATSON, 274.—Discovery of another new Planet by Dr. Peters: Elementary Lessons in Astronomy, LOCKYER: Tables for the mutual conversion of Solar and Sidereal time, LANG, 275.

Miscellaneous Scientific Intelligence.—Seventeenth Meeting of the American Association for the Advancement of Science, 275.—On the fall of Rain, as affected by the Moon, CHASE, 281.—On a supposed connection between the amount of Rainfall and the changes of the Moon, HENNESSEY, 283.—On a new Meteorite, GEINITZ, 284.

Obituary.—Professor Matteucci, 285.

Miscellaneous Bibliography.—Cambridge Physics. A Hand-book of Natural Philosophy, ROLFE and GILLET, 285.—Braithwaite's Retrospect of Practical Medicine and Surgery: Ranking's Half-Yearly Abstract of the Medical Sciences: Archives du Musée Teyler: The American Naturalist, 286.—Reliquiæ Aquitanicæ, LARTET and CHRISTY: A treatise on concentration of all kinds of ores, including the chlorination process for gold-bearing sulphurets, arseniurets, and gold and silver ores generally, KUSTEL: Catalogue de Minéraux, Roches, Fossiles, Modèles en Platre et Modèles en Bois des cristaux à vendre dans le Comptoir Minéralogique Rhénan, KRANTZ, 287.

Proceedings of Societies, etc., 287.

NUMBER CXXXVIII.

Page.

ART. XXVIII.—On the molecular structure of Uric Acid and its derivatives; by WOLCOTT GIBBS, ... 289

XXIX.—The Occultator; by THOMAS HILL, ... 299

XXX.—On the Amiens Gravel; by ALFRED TYLOR, ... 302

XXXI.—On the Artificial Formation of Organic Substances; by C. GREVILLE WILLIAMS, ... 327

XXXII.—Notes on the Caucasus; by Capt. F. VON KOSCHKULL, ... 335

XXXIII.—Notes on Mr. Charles Stodder's paper entitled "Nobert's Test-plate and modern Microscopes;" by W. S. SULLIVANT, ... 347

XXXIV.—Remarks on the nineteen-band Test-plate of Nobert; by J. J. WOODWARD, ... 352

XXXV.—Notes on the Geology of Southwestern Ontario; by T. STERRY HUNT, ... 355

XXXVI.—On the action of Sunlight on Bisulphid of Carbon; by O. LOEW, ... 363

Page.

XXXVII.—Observations on the Metamorphosis of Siredon into Amblystoma; by O. C. MARSH, ... 364

XXXVIII.—Notice of a new and diminutive species of fossil Horse (Equus parvulus), from the Tertiary of Nebraska; by O. C. MARSH, ... 374

XXXIX.—On Hansen's Theory of the physical Constitution of the Moon; by SIMON NEWCOMB, ... 376

XL.—Notices of papers in Physiological Chemistry—No. II; by GEORGE F. BARKER, ... 379

XLI.—Observations of the Auroras of Sept. 5th and 15th, 1868, at Mt. Desert Island, Maine; by W. S. GILMAN, Jr., 390

XLII.—Discoveries of new Planets; by J. C. WATSON, ... 392

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the combustion of hydrogen and carbonic oxyd in oxygen under great pressure, FRANKLAND, 394.—On the reduction and saturation of organic compounds by hydrogen, BERTHELOT, 395.—On the persulphid of hydrogen, HOFMANN, 396.—On the compounds of molybdic and phosphoric acids, DEBRAY, 397.—On iodid of silicon and silico-iodoform, FRIEDEL: On the density of the vapor of calomel, MITSCHERLICH, DEVILLE and TROOST: Connotations of Magnetism, CHASE, 398.

Mineralogy and Geology.—On a new Mineral in Cryolite, RAND, 400.—Notes on the Later Extinct Floras of North America, with Descriptions of some New Species of Fossil Plants from the Cretaceous and Tertiary Strata, NEWBERRY, 401.—On Human remains along with those of the Mastodon in the drift of California, WINSLOW, 407.—Meek on the shell structure of some Spirifera, 408.

Botany and Zoology.—Botanical Notices, 408.—Contributions to the Fauna of the Gulf Stream at great depths, POURTALES, 409.—Deep Sea dredgings in the region of the Gulf Stream, POURTALES, 413.—On the genus Lælaps, COPE, 415.—Considerations drawn from the study of Mole Crickets, SCUDDER, 417.—Remarks on two new fossil Insects from the Carboniferous Formation in America, SCUDDER, 419.—Siredon a stage in the development of Amblystoma, SILLIMAN, 421.

Miscellaneous Scientific Intelligence.—Earthquake of Aug. 13th—16th, 1868, 422.—Earthquake in California, Oct. 21: List of Papers read at the session of the National Academy of Sciences in August, 1868, at Northampton, 428.—On a Meteorite which exploded over Kansas, June 6, 1868, MUDGE, 429.—Corrigenda for Article XIV on Vision: British Association, 430.

Miscellaneous Bibliography.—Report of J. Ross Browne on the Mineral Resources of the States and Territories west of the Rocky Mountains, 430.—Report of James W. Taylor on the "Mineral Resources of the United States east of the Rocky Mountains," 431.—A treatise on the Concentration of all kinds of Ores, including the Chlorination Process for Gold-bearing sulphurets, Arseniurets and Gold and Silver ores generally, KUSTEL: The American Annual Cyclopedia and Register of Important events of the year 1868: The Wine Maker's Manual, REEMELIN, 432.—

Chambers's Encyclopedia: a Dictionary of Universal Knowledge for the people, 433.—Mitchell's Manual of Practical Assaying, CROOKES: The Workshop: a monthly Journal devoted to the progress of the useful arts, STEIGER, 434.—Thesaurus Siluricus: the Flora and Fauna of the Silurian Period, with Addenda, BIGSBY: Exposé des Formations Quaternaires de la Suède, ERDMANN: Prof. Safford's report on the Geology of Tennessee: The American Entomologist, WALSH and RILEY, 435.—How Crops Grow. A Treatise on the Chemical Composition, Structure and Life of the Plant, for all Students of Agriculture, with numerous illustrations and tables of analyses, JOHNSON: A Treatise on Optics; or Light and Sight theoretically and practically treated; with the application to fine art and industrial pursuits, NUGENT: Part 2 of the Butterflies of N. America, EDWARDS: Note, 436.
